I Finally Found the Correct Diagnosis

By Sally Prince

It is amazing how a single bone in your neck can make you feel really good or cause you to feel really bad. I had five misdiagnosis's over a period of two months, hearing from you have a brain bleed to all you have is high blood pressure. I thought I was going to die before anyone ever figured out what was wrong with me. After I fell off a ladder, I began to grow weaker and sicker and for a month a new symptom would appear each day. Luckily for me, my husband found the

Alpha Spine Center. First let me say there is no better care you can receive, Dr. Salminen and the Alpha Spine Center staff truly care for their patients. I have been receiving care at the Alpha Spine Center for over a month and words cannot express how much better I feel. I can finally function and have my life back. Today it has been a week since I held my adjustment, my posture is impeccably better, my headaches are history, and my blood pressure has returned to normal.

The NUCCA is painless, no snapping or cracking. I have referred several friends of mine to NUCCA doctors in other cities so they can join me on the road to recovery. Thank-you Dr. Salminen and Alpha Spine Center for literally saving my life! It truly is Gentle Proven Care.
